## Profile

Computer science graduate with a Python and SQL project in equipment booking. Seeking a junior software role involving validation and testing.

## Project

### Equipment booking prototype

January–May 2026

Coursework project, Example Institute

- Built a Python and SQL prototype for reserving shared equipment.
- Added checks for overlapping bookings and tested cancellations.
- Documented setup and known limitations using synthetic test records.

## Experience

### Library volunteer, Example Community Library

June–August 2025

- Checked returned items against the loan register and referred unmatched records to the librarian.

## Education

### Bachelor of Science in Computer Science

2023–2026

Example Institute

## Skills

Python, SQL, Git; test-case writing and setup documentation.
