Arjun Menon

Automation Tester

Bengaluru, India • arjun.menon@example.com

Summary

Automation tester with four years of experience building browser and API regression checks for business software. Uses TypeScript, Playwright and documented test data to investigate failures and maintain useful continuous-integration feedback.

Experience

Automation Test Engineer, Example Cedarloop Workflow Systems — Apr 2023 - Present

Bengaluru

- Maintain 86 browser regression tests for purchase approval and account administration workflows using Playwright and TypeScript.
- Create independent test records for parallel runs and clean them up after each test to prevent shared-data failures.
- Investigate failed CI runs using traces and API responses, separating product defects from test and environment issues.
- Added focused API checks for permission boundaries and documented the scenarios still covered by exploratory testing.

Junior QA Engineer, Example Northwick Software Studio — Jun 2022 - Mar 2023

Bengaluru

- Converted stable account-management checks into a reviewed regression suite alongside manual testing.
- Reported defects with steps, expected behaviour and reproducible test data for the development team.
- Maintained a weekly list of unstable tests and verified fixes before returning them to the release suite.

Education

Bachelor of Engineering, Computer engineering — 2018 - 2022

Example Cedarvale Institute of Technology

Skills

Automation: Playwright, TypeScript, API testing, Test fixtures

Reliability: Test isolation, Trace analysis, Failure triage, Regression design

Delivery: Git, CI pipelines, Defect reporting, Exploratory testing
