Arjun Nair

Entry-Level Software Engineer

Kochi, India • arjun.nair@example.com

Summary

Computer science graduate with a software internship and two maintained web projects. Builds JavaScript interfaces and Python APIs, writes automated checks, and documents decisions. Looking to contribute to a product team with code review and clear engineering practices.

Experience

Software Engineering Intern, Example Rainbranch Software Workshop Jan 2026 - May 2026

- Implemented search and pagination for an internal equipment directory using React and a Python API.
- Added 16 regression tests for empty results, invalid filters and pagination boundaries.
- Worked through code review comments and wrote setup instructions used by two incoming interns.

Education

BTech, Computer Science 2022 - 2026

Example Harbour Institute of Technology · CGPA 8.1/10

Skills

Languages: JavaScript, Python, SQL

Development: React, FastAPI, PostgreSQL, REST APIs

Practice: Git, Unit testing, Code review, Debugging, Accessible form basics

Projects

Campus equipment booking app

- Built a booking workflow with conflict checks, role-based access and a PostgreSQL data model.
- Wrote integration checks for concurrent booking attempts and documented known limits in the project README.
- Deployed a demonstration using synthetic equipment and user data.

Open timetable parser

- Converted sample CSV timetable files into a searchable weekly view.
- Added validation for missing headers, malformed times and overlapping sessions; included sample files and reproduction steps.
