Nikhil Rao

Power BI Developer

Hyderabad, India • nikhil.rao@example.com

Summary

Power BI developer with four years building operational reporting for retail teams. Creates semantic models, DAX measures and documented refresh processes, with a focus on reconciled definitions and usable reports. Works with business owners to test totals, access rules and reporting assumptions.

Experience

Power BI Developer, Example Linden Analytics

Jan 2024 - Present

Hyderabad, India

- Built a sales reporting semantic model covering 28 retail locations, separating transaction facts from product, location and date dimensions.
- Replaced six manually assembled weekly reports with a shared Power BI report, reducing preparation time from 5 hours to 50 minutes per week.
- Created DAX measures for sales, returns and net revenue and reconciled monthly totals with the finance-approved extract.
- Documented refresh dependencies and tested row-level access scenarios with business owners before releasing the report to 42 users.

Reporting Analyst, Example Linden Analytics

Aug 2022 - Dec 2023

Hyderabad, India

- Reconciled weekly spreadsheet reports to source extracts and recorded differences for business owners.
- Built Power Query transformations for repeatable imports and documented source-column changes.

Education

B.Tech in Computer Science

2018 - 2022

Example Lakeside Institute

Skills

Power BI: DAX measures, Power Query, Semantic modelling, Row-level security testing

Data delivery: SQL, Star schema, Data reconciliation, Refresh monitoring

Projects

Retail returns analysis

- Built a demonstration model with synthetic sales and returns data, keeping transaction grain explicit.
- Documented how return dates and sales dates affected the measures and tested totals against a reference query.
