Diya Kapoor

Tableau Developer

Gurugram, India • diya.kapoor@example.com

Summary

Tableau developer creating operational dashboards for logistics teams. Builds documented data models, reconciles measures against reference queries and works with users on filters, labels and reporting interpretation.

Experience

Tableau Developer, Example Elm Logistics Analytics — Jan 2024 - Present

Gurugram, India

- Built Tableau dashboards for shipment exceptions across 12 distribution locations using agreed delivery and exception definitions.
- Reworked a workbook data model to preserve shipment-level totals when combining event records, resolving duplicate-count discrepancies in three views.
- Reduced the measured initial load time of one dashboard from 11 to 6 seconds in a documented test by removing unused fields and simplifying calculations.
- Ran review sessions with 18 operations users and revised filters, labels and tooltips to clarify the difference between late shipments and open exceptions.

Reporting Analyst, Example Elm Logistics Analytics — Aug 2022 - Dec 2023

Gurugram, India

- Prepared weekly shipment reports and reconciled location totals against reference SQL queries.
- Maintained reporting definitions and collected user issues for the dashboard development backlog.

Education

B.Sc in Statistics — 2019 - 2022

Example Lakeside Institute

Skills

Tableau: Calculated fields, Relationships and joins, Dashboard actions, Extract refresh checks

Data practice: SQL reconciliation, Grain definition, Performance testing, User review sessions

Projects

Shipment exception demonstration

- Created a synthetic shipment dataset with multiple events per shipment to demonstrate the effect of data grain.
- Published a written walkthrough of the measures and test cases without using customer or employer records.
